Someone submitted their comments on the Transparency rule to an OAR website. I will forward this to the docket. Do you want any sort of reply to the person who submitted the comments?

Forwarding this inquiry that was submitted via an OAR website about stationary sources and air pollution and appears to be about the proposed rule titled, "Strengthening Transparency in Regulatory Science."

Thank you.

Comments:

I understand there is a proposed rule change which would, in part, eliminate the confidentiality of test subjects. It's pretty obvious no one wants their individual personal data available for public scrutiny. And it's also obvious this rule is attempting to dial back air pollution standards by eliminating landmark research. This rule change needs to go away. I'm old enough to remember when our cities' air were filled with smog. It was awful.
